

That the FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. I have only been a member of the non-call list since 10/1/31 and I receive on average 5 fewer calls a day. I used to have the same telemarketing places calling everyday, sometimes twice a day, and as late as 9:30 in the evening. My phone has stopped ringing. The Indiana State Legislature rarely passes laws benefiting the citizens of Indiana in a meaningful way. Please do not preempt our State law with a federal regulation. I have a right to be left alone at home. I have a right to post no soliciting signs on my front door, please don't take away the no-soliciting sign that the Indiana State legislature has place on my phone line! Thanks! Bonnie B. Phillips
